

## Jasper County Pool Permit and Requirements

Permit # \_\_\_\_\_ Date \_\_\_\_\_

The following documentation will be required prior to being issued a swimming pool permit.

- Copy of business license of the installer (and electrical contractor if required)
- Plat of property showing the planned location of the pool - **County Clerk of Courts on 1<sup>st</sup> floor**
- Plan/specification for type of fence to be installed and must meet the following: The fence must be at least four feet high. Fences that are shorter than four feet won't protect small children and pets from going out. The distance between the ground and the bottom of the fence should be greater than 2 inches but no more than 4 inches. This rule is again for safety purposes so that no one can enter your premises. The gate of your pool fence must be self-closing and self-latching. It should also open away from the pool, not towards it. This code is specifically for the safety of swimmers, and the self-closing and self-latching door will keep your kids and pets safe in case you accidentally leave the door open. Also, since the door will open outwards, there is no danger of people bumping into the fence door accidentally. The latch of your gate should be at least 54 inches above the ground or at least 3 inches below the top of the poolside gate. As long as the latch can be opened by reaching over, it should be placed on the high end. Having the latch on the high side of the door is important so that little kids or pets don't have access to it. If the fence around your pool is in conjunction with your house, you are required by law to install door alarms on all doors that open to the pool area. Door alarms are an excellent safety feature so you know at all times who is coming in and out of your pool area. Lastly, any openings in the fence shouldn't have a passage that is larger than a sphere with a diameter of four inches. An exception to the fencing requirements would be a swimming pool with a powered safety cover that complies with ASTM F 1346.

\*Please be aware of septic system when installing your pool
